PROFILE

I create websites and applications that are dynamic and user-centric, emphasizing accessibility, adhering to best practices, prioritizing SEO, and optimizing performance.

EXPERIENCE

Transport Planner . Zuellig Pharma Corp.   Nov. 2010 - Present

- Execute the orders in the SAP system and ascertain the total volume and weight.
- Evaluate the number of trucks required for delivering the order to the customer based on the package's volume and weight.
- We'll collaborate with external trucking services to schedule and oversee package pickup, ensuring continuous communication and support until the successful delivery to the customer.

Amazon VA . Zephyr Tech LLC   Dec. 2022- June 2023

In wholesale research:
- We prioritize finding suppliers with competitive prices
- Aligning with our strategy to sell on Amazon for a $3 profit and 5% ROI
- To streamline tasks, we use Trello, ensuring a weekly goal of generating at least 10 leads.

Feb. 2021- Sept. 2022

Amazon VA . Andrew Pipkin LLC

To quickly find leads:
- I use manual sourcing, reverse sourcing, and storefront stalking.
- Seller Amp SAS helps by automatically listing items in Google Sheets. My criteria:
- least $3 profit and 30% ROI per item with a minimum of 100 monthly sales, or 20% ROI with 500 monthly sales.

PROJECTS

Korean Food App • FRONTEND

- Develop using Next JS ,Typescript and styled with Tailwind CSS
- Our Korean Food App envisions being the ultimate destination for authentic Korean cuisine in the Philippines. We aim to connect users with diverse flavors, seamless ordering, and a vibrant community, making us the go-to platform for a delightful Korean food experience.

Doctor Booking App • MERN Stack

- Developed using the React Library for the frontend, while the backend is powered by Node.js and data is stored in MongoDB.
- Our Doctor Booking App aims to simplify healthcare access. We connect users with medical professionals for easy scheduling and personalized health management, fostering a healthier community through accessible healthcare services.
